FEATURES

PORTFOLIO MANAGEMENT

Manage your entire portfolio of plants with a single tool

ANALYTICS CAPABILITIES

Production metric analytics, streamline system consolidation, throughput predictions, predictive maintenance

ROOT-CAUSE ANALYSIS

Drill down intelligence for KPIs; find root causes behind production downtime

360 INSIGHTS

Machine health diagnostics; monitor relevant KPIs for any manufacturing cell, machine or the entire shop floor

PERFORMANCE BENCHMARKING

View best performing machine output characteristics; benchmark against expected performance parameters and set standards

ASSET AGNOSTIC

Unification of data from all devices, API level integration with third party software

DETECT ANOMALIES AND OUTLIERS

Identify outliers which may be an early warning for issues in device production or deployment

SMART ALERTS AND DIAGNOSTICS

Detailed reporting via SMS and email notifications
